

Flexible antenna extender GN25N

The GN25N is a flexible antenna extender, also known as gooseneck, which is particularly suited for situations where a flexible adjustment of the antenna's angle is required.

- Compact design for handy operation and simple installation
- Flexible gooseneck for quick and easy adjustments

Product details*	
Frequency range	0 – 4000 MHz
VSWR	< 1.5
Insertion loss	< 0.8 dB
Power rating (RMS)	50 W
Insertion length	250 mm
Weight	275 g
Max. bending angle	90°
Standard color	Black

Installation*	
RF connections	1. Male N-type 2. Female N-type
Mounting	Directly to matching connectors

*Specific adjustments on request

Order number	NSN	Product
GN25N	5985 - 58 - 000 - 1024	Product as described above
GN25N-H30		Gooseneck with a 300 mm insertion length (weight 300 g)

Instructions for use: To avoid the connector from being damaged, do not rotate the antenna when the gooseneck is in a bent position. Always straighten the gooseneck first, before changing the bending direction. The maximum bending angle of 90° shall not be exceeded.
