

High Gain Dual-Band Manpack Antenna

HD820Q

The HD820Q is a high gain dual-band manpack antenna covering the GSM and 3G bands. The antenna is particularly suited for portable communication and jamming applications. Its centre fed design minimises interference of the human body on the radiation performance of the antenna.

- Compact and unique electrical design
- Optimised performance for GSM and 3G frequency bands
- Rugged antenna construction with shock absorption spring
